

WISE ENGINEERING & SURVEYING CO., LTD.

# Perfecting the Art of Surveying

Hong Kong's growing construction industry recognizes the need for precision surveying talent and quality execution says ANDY LUK MAN LUNG of WISE Engineering & Surveying Co., Ltd.

“Our key is ‘Your Best Partner in Hydrographic Survey’, says Andy Luk Man Lung, Director of WISE

Engineering & Surveying Co., Ltd.

The firm was established in 2001. “Since then, we have consistently focused our efforts on providing surveying service of the highest quality. As a professional surveying company, we believe that there is a high demand of efficiency and productivity amongst Hong Kong construction firms and we expect to provide and maintain high accuracy and efficiency in our services to the industry,” says Lung.

Leading the industry in terms of

“To develop, apply and provide these services to our client are our scopes and goals.

Information System (GIS) are the necessary service items of the future.

“To develop, apply and provide these services to our client are our scopes and goals. We believe all the survey works

will be more remotely and user-friendly in the future,” he says.

## Efficiency & Skill

According to Lung, the industry has to raise the quality and efficiency of the survey work to keep in step with the growing needs of the industry. “We believe that high technology standard in survey skill and devices will play an important role in the future of engineering surveying.”

“Hong Kong is a small market and regular work is abundant. There are no any big changes in construction and civil works because we need to follow the Code of Practice, Guideline and Guidebook. For expansion, we need to source business in the Greater Pearl River Delta

“We believe that high technology standard in survey skill and devices will play an important role in the future of engineering surveying.”

and overseas.”  
At this point we are not equipped to handle the Greater China market but we can offer service in the Greater Pearl River Delta. Over the last a few years, we had some survey projects in Macao and Taishan (Guangdong Province). It is not easy to handle the construction works because different culture and working style. We lost money in those projects, which is why we came back to Hong Kong. Now, we want to try once again. We have the previous experience and relationship, I hope we can do it better.”

**Building on Quality**

“Now, we have the certificate of ISO 9001, ISO 14001, OHSAS 18001, IMCA,

etc. our company has international recognition in professional surveying. Future, we wish to focus on mainland China and overseas markets because we have the knowhow, technology and resources to build on our reputation and offer sustainable quality to the market. The secret of our success is simple – Quality always,” concludes Lung. ■
