

MOON GRASS DESIGN WORKSHOP LTD.

Creative & Sustainable Solutions

ARTHUR YEUNG and JUNE LEUNG create exquisite, functional spaces for corporate and private clients in five key cities across China.

June Leung is a seasoned interior design industry professional with more than two decades of experience in the field. She spent her first 15 years working in Hong Kong followed by a two-year stint in Beijing.

In the Mainland capital, existing clients invited her to work on a large office relocation with the project's client design team in Hong Kong. Consolidating opportunities, she returned to Hong Kong in 2010 and established Moon Grass Design Workshop Limited, where she now sits as Director.

As a key finance centre in Asia, Hong Kong is abuzz with business activity, resulting in the ceaselessly growing number of companies setting up offices in the city. From established brands to notable start-ups of domestic and international origin, varying in size and discipline from the founding to the expansion stage, all at one point or another need dedicated workspaces. This relatively vibrant ecosystem is an exciting slate for Moon Grass Design Workshop's trade.

A Collaborative Investment

"Interior design is a process of collaboration of an idea between client and designer," shares General Manager Arthur Yeung. "We are in a profession that delivers the ideal spatial themes to make what clients envision into reality. We are not putting our designs out there and forcing the clients to accept them. We are more concerned with sustainable

spatial design and providing a comfortable environment to help our clients in achieving their goals.

"Our belief is that interior design is an investment and an asset, not an expense. An aesthetically pleasing and functional space will create value for the client both internally and externally, including a boost in the brand's reputation, as well as generating high morale and productivity."

Moon Grass Design Workshop continues to grow as existing clients bring referral after referral to its doorstep. Outside Hong Kong, the company serves key customers in Shenzhen, Beijing, Shanghai and Hangzhou. Its portfolio of residential and recreational as well as commercial and retail spaces proceeds to expand and impress. A can-do philosophy, flexibility, the ability to listen and willingness to change, and a lot of heart, characterize June Leung and Arthur Yeung's work, and are most evident in the final product. ■
