

WAN KING ON INVESTIGATIONS

Sleuths of Hong Kong

Business interests are more frequently embroiled in mystery and intrigued than we realize. This private agency is set on uncovering the plot.

An uncomfortable reality that businesses and private individuals have to come to grips with is that unsavory practices, entities, and characters do exist. Both the dismissive and guarded have fallen victim to various forms of malicious intent, and no matter how modern or mature a society, there will remain a felonious presence putting companies and households at risk. For preventive and curative measures, Wan King On Investigations steps in.

A Member of the Association of British Investigators and the World Association of Detectives, Wan King On (WKO) is one of the largest private investigation agencies in Hong Kong. Formed by a group of ex-disciplinary forces members, it has successfully resolved numerous cases locally and overseas, serving the industry and accumulating goodwill for more than 20 years.

According to Procedure

The company exercises several capacities in business and personal investigation, from background checks to locating missing persons. It has experience in marital cases, property matters, debt collection, and data concerns. It utilizes state-of-the-art equipment and techniques in its work, and operates in equal capacity both within and beyond the locale.

Interestingly, the need for such services has grown considerably. To cope with the demand for private investigation services, WKO has established five branch offices scattered across Hong Kong Island, Kowloon Peninsula and the New Territories. It plans to set up more branches in Mainland China in upcoming years.

WKO has put together the largest team of investigative officers in the

Wan King On Investigations CEO Tommy Chan and Business Consultant Clarence Ng receiving the award for Most Valuable Services in Hong Kong.

industry, consisting of over 60 full-time and part-time crewmembers. Before they formally report to duty, all undergo rigorous training courses and expert coaching by ex-disciplinary forces personnel.

The Long Arm

Unlike some of its competitors, WKO boasts the full functionality of a law enforcement agency and a service-oriented private enterprise. It is sufficiently staffed from sales force to operative units, and provides its clients a full range of services that includes business consultancy, workplace injury claims, employee performance investigations, due diligence on business partners and investors, and surveillance.

Maintaining the service standard of its crew while growing the unit is one of the key challenges the agency is facing, as it cultivates existing business networks throughout Asia, the U.S. and Canada. The next step is branch expansion in Greater China regions such as Taiwan. The trade itself is in rapid, constant

development, and further classroom and field training for its operatives are required just to keep up.

Nonetheless, the results remain impressive. Since business began, WKO has achieved an average case hit rate of over 90%. Those in the company abide by Sun Tzu's Art of War more than most, particularly the passage on knowing thy enemy. It cannot be helped in this unique, highly dramatized but absolutely necessary industry, where delicate matters, secret information and elusive targets are the order of the day. ■
